

Dear Representative,

As one of millions of US dietary supplement users whose daily regime includes supplements to maintain overall health and as a precautionary measure from illness, I urge you to co-sponsor HR2627, The Dietary Supplement Fair Tax Act. By supporting this legislation, you will be enabling me through a cost savings, to prevent illness thereby lowering the current escalating health care costs of our nation. Currently, only prescription drugs and over-the-counter products are considered covered by tax-free health dollars. With the beneficial background of supplements, it is only fair to include them as valid health care expenses. It is estimated that 70% of the population uses some form of natural supplementation for their health and spends billions of dollars, we are not a small group of the populace these days.

Please co-sponsor HR 2627 and assist Americans in protecting their health, saving monetarily, and therefore indirectly lowering the healthcare costs of our nation.

Sincerely,

**[Click here to identify your congressman and obtain contact information including e-mail in most cases.](#)**
